

My name is Dana Quillman and I am running for Arcata City Council. Please visit my website at [danaquillman.com](http://danaquillman.com) for information that is not easy to access on the mainstream media, often because it is censored.

The lies about Covid-19 and the injections that caused the bribery, coercion and blackmailing that has become the norm in order to convince people to get jabbed, are being exposed one by one. I think we are headed to a tipping point where the mass disinformation and censorship campaign is no longer going to be able to fool the general public.

The most shocking information that has recently come to light is that Pfizer did not test for transmission before the injections were released! Of course, it has become very obvious to anyone who is paying attention, that the injections do not prevent transmission. However, this week a Pfizer executive was asked under oath if the injections had been tested for transmission before they were released and she admitted they had not! Gee, I wish someone would have thought to ask that simple question before they were released. Lesson learned, ask more questions. However, even if the questions were asked, how would we know that we were receiving truthful answers? One silver lining of the “pandemic” is that it has become increasingly apparent that big pharma, big tech, the mainstream media, and unfortunately, even our government are not very trustworthy. We must never stop questioning authority.

Think of all of the persecution that has gone on towards the unvaccinated. Think of all those cartoons in our local media that have derided the unvaccinated and accused them (me) of being responsible for murdering people. Think of all of the children and young people that have little or no risk of being infected but were given these injections, some so that they would be allowed to attend school! Think of all of the people who lost their jobs including nurses, doctors, law-enforcement, fire fighters, the military, teachers, government employees, and people from almost every other profession. Think of the discrimination that has gone on, the banning of people from shopping at some stores and attending all kinds of public events. Think of all of the people who have been excluded from being invited to events held by friends and family and those who have even lost important relationships because of their choice to not take the injections. The unvaccinated have been treated like they are a pariah by society in general. Some people refused the injections for health reasons but many people, including myself, refused them because of the basic moral and ethical principal, that no one should have authority over another person’s body, the government or otherwise, period.

Actually, this news is not shocking to me at all. After all, the FDA fought very hard to keep the 55,000 pages of Pfizer testing documents under wraps for 75 years. Hmm, that is just about a long enough time that everyone who has taken the jabs, will either be very old or dead by the time the documents would be released to the public. Luckily there are still some people in power with integrity and so the FDA lost that court case. On my website is a credible article that stated the FDA gets about 75% of its funding from the big pharma industry. This constitutes exactly what a “captured” government regulating agency is, and the FDA is not the only one. The FCC is also a captured regulating agency, hence the reason the dangerous 5G technology is being given free reign.

The Pfizer documents are currently being examined with a fine tooth comb. There are findings that have shocked even me and make it obvious why Pfizer wanted the documents hidden. You may see these findings on my website and also the resource to stay connected on this investigation. It is disgraceful that people are not being informed of all of this on the legacy MSM, but it is understandable because it is also largely funded by big pharma!

On Friday September 30th Governor Newsom signed into law one of the most totalitarian bills that will directly affect not only the careers of doctors who have integrity but also the health of all Californians. "Informed consent" has already been basically banned in regards to the experimental gene therapy injections. However our state government has taken one more step in tying the hands of our doctors by the passing of AB 2098 which according to our totalitarian Governor "provides that the dissemination of misinformation or disinformation related to Covid-19 by physicians and surgeons to a patient under their care constitutes unprofessional conduct." I can only hope that there will be lawsuits galore to take down this law. I challenge all doctors to unite and form a coalition to stop this medical tyranny! If they don't, I do not have much hope for our established medical system.
